COST

- MDM forces us to own every machine.

- HW for external consultants. Long term we want to offer naisdevice to personal/external devices.

- Productivity from day one.

- Less "lending" logistics.

- Less "shoehorning" dev machines into/out of "gen pop".

LEEWAY

- Escape "The Lock-In"

- Treat client security like all our apps - Continous delivery. (Not wait for vendor roadmap)

- Deliver a superior experience, build a(n info-sec aware) culture and improve security.
