DEVELOPER EXPERIENCE

- Full control in choosing and optimising personal toolbox.

- Avoid forcing state.

- Build a security conscious culture where users can make informed choices themselves.

COST

- MDM forces us to own every machine.

- HW for external consultants. Long term we want to offer naisdevice to personal/external devices.

- Productivity from day one.

- Less "lending" logistics.

- Less "shoehorning" dev machines into/out of "gen pop".
